**DETAILED ACTION**

1. Applicant's election with traverse of Group II, claims 11-18 in Paper No. 7, filed 09 June 2003 is acknowledged. The traversal is on the ground(s) that Group IV, claim 20 should be a part of Group II. This is not found persuasive because Groups II and IV are different inventions that have mutually exclusive functions. Group II has the insert panel on the back of the substrate while Group IV has the panel on the front of the substrate.

The requirement is still deemed proper and is therefore made FINAL.

2. Claim 21 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim 21 requires that the means to secure of claim 12 be a tab that extends through at least one tab opening defined in the

Art Unit: 1772

substrate. Claim 12 requires that the insert be on the back surface of the substrate. The specification as filed provides no support for an insert on the back surface of the substrate that also has tabs, which extend into tab holes in the substrate from the back of the substrate to the front of the substrate. The specification only supports tabs, which extend from an insert on the front of the substrate through holes in the substrate to the back of the substrate. This claim is not addressed in the art rejection as projection of the tabs from the back to the front surface of the substrate would degrade the appearance of the front of the substrate, which is contrary to the intent of the specification.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 11-18 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Barberis (U.S. 4,905,511)

Art Unit: 1772

Barberis teaches, in Figure 3, decorative insert panels (element 5, which protrude through openings in the substrate (element 4). The panels may be joined to the substrate by numerous means(col. 3, lines 20-25, 5-40). These disclosures anticipate the instant claimed invention.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William P. Watkins III whose telephone number is 703-308-2420. The examiner works an increased flex time schedule, but can normally be reached Monday through Friday, 11:30 A.M. through 8:00 P.M. Eastern Time. The examiner returns all calls within one business day unless an extended absence is noted on his voice mail greeting.
